

CFM Crewing

Efficient crew management

Optimize your crew management due to more efficient cooperation with your agencies and crew

CFM Crewing enables you to handle and coordinate all crew related procedures in one central place. Thanks to a direct integration of your agencies you can streamline processes and minimise effort for communication.

CFM Crewing's scope includes areas such as the master data management of seafarers, planning the crews on board as well as their relief, management of the working and rest hours of the crew, detailed crew-related reports and the complete and automated billing of the crew using public APIs that can

be accessed by your preferred applications for book-keeping and cash management.

CFM Crewing comes along with an easy to handle but extensive user roles and rights management, assisting you to customise the work spaces of your users. By making the crew part of all processes, CFM Crewing focusses on building interactive teams, that are steadily optimising the crewing processes. With an optimal level of planning and support of daily tasks, CFM Crewing ensures that your most valuable asset is well supplied.

Detailed

The Activity List shows you all modifications within staff data.

- + Effortless crew planning with drag & drop
- + Travel expense registration, experience management and performance reporting on board and ashore
- + Detailed setup of mandatory certificate requirements per rank on STCW-, flagstate-, company-, charterer- or vessel-level

About Hanseaticsoft

Hanseaticsoft was founded in 2009 by Alexander Buchmann. Buchmann and his team draw on several years of experience in the software department of a medium-sized shipping company in Hamburg, the third largest container harbour in Europe. In Hanseaticsoft, the idea of a new software concept was finally realised: giving enterprises access to new and efficient

technologies by means of intuitive software solutions. Today Hanseaticsoft has more than 60 employees. It is now part of Lloyd's Register Group, one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructure for clients in over 75 countries worldwide.
