

# CFM Inspection Report

Mobile inspections

Capture observations on your tablet or smartphone  
in an easy and comfortable way

No matter if execution or post-processing – auditing ships is a complex process. Your final report is particularly complicated because comments are usually handwritten, and pictures have to be analysed. From now on you will need less time for this process thanks to CFM Inspection Report. All you need for auditing fits right in your pocket - CFM Inspection Report lets you conveniently conduct inspections using your mobile device. While auditing, you simply add photos, videos, comments or voice notes to your report. Whether iOS or Android, smartphone or tablet – simply use your favourite device to comfortably execute your inspections.

The whole process is designed to be as easy as possible. After the setup of your company specific templates in the office using CFM Inspections & Audits, you can access all templates with the mobile CFM Inspection Report app while on the vessel. This means, that you can easily perform your inspection step by step using your mobile device.

To finalise the inspection, you simply synchronise your findings with the cloud, making them available for the vessel as well as the office – enabling follow-up procedures ashore and on board. Afterwards you can focus on your next inspection and finish your work back in the hotel or office.

## Compact

Observations, photos, videos and comments: All-in-one solution.

## Cross-platform

iOS or Android: CFM Inspection Report is available for all operating systems.

## Intuitive

Immediate access. Time- and cost-consuming trainings are history.

## Time-saving

Reports are finalised in one place and are available for employees.

## Work paperless

The whole inspection process can be completed on your tablet or smartphone. Since all data is provided offline, you don't need an active internet connection for auditing. Synchronisation starts as soon as an active data connection is provided.

## Expand your system

Technical and nautical inspections as well as audits and vettings become really easy. It is also possible to expand your system with your own templates. No adequate report available? No problem. Observations can be captured with the ad-hoc-report, too.

## Key features

-  Mobile app for straightforward inspections
-  Direct synchronisation of findings with vessel and office
-  Option to set up ad-hoc audits
-  No need for paper, pen or camera - Easy completion of findings with photos, videos, voice notes or corrective actions
-  Inspection process completely digitalised

## Straightforward inspection process

## About Hanseaticsoft

Hanseaticsoft was founded in 2009 by Alexander Buchmann. Buchmann and his team draw on several years of experience in the software department of a medium-sized shipping company in Hamburg, the third largest container harbour in Europe. In Hanseaticsoft, the idea of a new software concept was finally realised: giving enterprises access to new and efficient

technologies by means of intuitive software solutions. Today Hanseaticsoft has more than 60 employees. It is now part of Lloyd's Register Group, one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructure for clients in over 75 countries worldwide.
