

CFM Crew Portal

Reduce administrative burden

Self-administrative crew data management –
on board, in the office and on the go.

Managing crews, their personal data, certificates as well as documents can be a time-consuming process. With CFM Crew Portal, the management of crewing processes becomes much simpler and more transparent while reducing administrative effort. It enables your seafarers to autonomously view and manage their personal data or documents such as certificates and to access company news and shared data. This is supported by a detailed user role concept allowing you to define access privileges just the way you need. The crew can simply view upcoming assignments, check alerts

for document renewals and download relevant files on their desktop, tablet or mobile. Thanks to an intuitive user interface, CFM Crew Portal can immediately be used productively without any need for time-consuming trainings. By letting the crew actively take part, you can not only streamline administrative tasks but continuously optimise the overall efficiency of your crewing processes. With an optimal level of planning and support of daily tasks, CFM Crew Portal ensures that your most valuable asset – the seafarer - is well supplied and stays up to date.

Increased productivity

Get more done and work from wherever you are – just take your phone.

Flexible

Forgot something? No problem, take out your phone and get it done.

Integrated

Take advantage of the perfect interaction of all apps integrated in CFM.

Up-to-date

Be always up-to-date, no matter whether you have a computer at hand.

Key features

-  Works in the browser and on your mobile device
-  Enhances retention rate and commitment of your crew
-  Intuitive and easy to use interface for the crew
-  Increases crew's autonomy, crew data quality and availability
-  Significantly reduces administrative burden for related parties, such as crew manager or manning agencies

Crew Portal Mobile

Crew Portal Mobile gives your crew the flexibility to manage and access their data regardless of location.

Your crew can simply log into the mobile companion app of the Crew Portal and manage their data on the fly or check upon their next assignments using their favourite mobile device.

Thanks to an intuitive and easy to use interface, the app does not only increase crew's autonomy, crew data quality and availability but also significantly reduces administrative burden for related parties, such as crew manager or manning agencies.

About Hanseaticsoft

Hanseaticsoft was founded in 2009 by Alexander Buchmann. Buchmann and his team draw on several years of experience in the software department of a medium-sized shipping company in Hamburg, the third largest container harbour in Europe. In Hanseaticsoft, the idea of a new software concept was finally realised: giving enterprises access to new and efficient

technologies by means of intuitive software solutions. Today Hanseaticsoft has more than 60 employees. It is now part of Lloyd's Register Group, one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructure for clients in over 75 countries worldwide.
