

CFM World Map

The new view on your fleet

CFM World Map expands the position data of your fleet with detailed, clear and useful information

Up to now several applications were needed to show the activities of your fleet, the position data or upcoming vessel visits. CFM World Map offers you a comfortable alternative: See all relevant information at a glance. The appealing and well-arranged design gives you an immediate overview of all the activities of your fleet. The positions of companies, ships and ports can be easily faded in and out. This way you design the level of detail at your convenience. CFM World Map focusses on relevant vessels of your fleet and important information is directly displayed.

No matter if all fleet movements or only one single ship: you decide which information you want to see. That way you verify the data of charterers faster and coordinate the business trips of you inspectors more efficiently. Receive messages automatically as soon as your ships enter or leave a defined war zone. This helps you to take the right steps in time. To show detailed information CFM World Map offers an intelligent search mode. Type the name of your ship, inspector, airport or port and your result will be highlighted with only one single click.

Focussed

Important information is highlighted so that you won't miss a thing.

Safe

Create e.g. war risk zones and be aware of your vessels entering perilous territory.

Integrated

Take advantage of the perfect interaction of all apps of CFM.

Informed

Be aware of the location of ships or business travelling inspectors at all times.

Personalised view

For a better overview CFM World Map will only show the ships you supervise. This way you keep track of your own fleet and are able to rapidly access important information, e.g. short- and long-term schedules. Of course, you can also change the view or check the activities of the entire fleet.

Key features

- + Creation of war risk or emission control areas
- + Positions of ships, ports and yards can be easily faded in and out
- + A variety of information accessible without the need to open other modules
- + Locations of ships or business travelling inspectors always in view
- + Option to change the level of detail at your convenience
- + Heatmaps highlight relevant information – e.g. ports with the most crew changes in the last 90 days

Highlight war-zones

Cruising through war zones has high influence on your daily business because you have to check charter parties or consider bonus payments. CFM World Map allows you to mark these areas and automatically sends notifications as soon as one of your ships enters or leaves a defined war area.

About Hanseaticsoft

Hanseaticsoft was founded in 2009 by Alexander Buchmann. Buchmann and his team draw on several years of experience in the software department of a medium-sized shipping company in Hamburg, the third largest container harbour in Europe. In Hanseaticsoft, the idea of a new software concept was finally realised: giving enterprises access to new and efficient

technologies by means of intuitive software solutions. Today Hanseaticsoft has more than 60 employees. It is now part of Lloyd's Register Group, one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructure for clients in over 75 countries worldwide.
